PROFESSIONAL SUMMARY

Motivated Software Developer with hands-on experience in full-stack development, Python-based ML pipelines, and API integration. Currently building expertise in Dell Boomi iPaaS and actively deepening knowledge in Generative AI, LLMs, Prompt Engineering, RAG pipelines, and LangChain. Passionate about applying AI/ML technologies to solve real-world problems, with practical exposure to supervised learning, data preprocessing, and model deployment.

TECHNICAL SKILLS

AI / ML: Python (Pandas, NumPy, Scikit-learn), Supervised Learning, Data Preprocessing, Model Evaluation, Streamlit

Generative AI & LLMs: Prompt Engineering (Learning), LangChain Concepts (Learning), Hugging Face (Basics)

Frameworks & Libraries: Scikit-learn

Backend & APIs: Node.js, Express.js, REST APIs, API Integration

Frontend: React.js, HTML5, CSS3, Bootstrap, JavaScript

Databases: MySQL

DevOps Awareness: Docker, Git, GitHub, Vercel

Integration: Dell Boomi – API Workflows, Data Exchange (Training)

WORK EXPERIENCE

Associate Software Developer – Integration (Boomi) | RESKOM Technology | 2026 – Present

- Undergoing structured training in Dell Boomi platform for enterprise iPaaS integration.
- Designing and understanding integration processes, API workflows, and data exchange between systems.
- Working with REST APIs and understanding their role in connecting applications and handling data flow.
- Gaining exposure to real-world integration scenarios and cloud-based application connectivity.

PROJECTS

Heart Stroke Prediction <https://heartstrokeprediction-2222.streamlit.app/>

- Built a supervised ML pipeline to predict stroke risk using structured healthcare data — directly applicable to real-time AI project work.
- Performed end-to-end data cleaning, feature engineering, and preprocessing to improve model reliability and accuracy.
- Deployed the trained model via Streamlit, enabling live predictions from user inputs — demonstrating model evaluation and API-level integration.
- Gained practical understanding of data preprocessing pipelines and model lifecycle management.

Technologies: Python, Scikit-learn, Pandas, NumPy, Streamlit

Cryptocurrency Tracker <https://vamshicrypto.ccbp.tech/>

- Developed a real-time web application consuming live cryptocurrency data via REST APIs.
- Implemented robust testing and debugging to validate data accuracy and application reliability.
- Strengthened understanding of API integration patterns — foundational for LLM API and LangChain integrations.

Technologies: React.js, REST APIs, JavaScript

Developer Portfolio Website <https://portfolio-chi-silk-flyfdpxdpd.vercel.app>

- Designed and deployed a personal portfolio with responsive layouts and automated CI/CD via GitHub and Vercel.

Technologies: *HTML5, CSS3, Bootstrap, GitHub, Vercel*

EDUCATION

B.Tech – Computer Science & Engineering

Guru Nanak Institution of Technical Campus, Ibrahimpatnam | CGPA: 7.5 | 2021 – 2025

Intermediate – MPC

Narayana Saraswati (R), RangaReddy | 95.6% | 2019 – 2021

CERTIFICATIONS

- Full Stack Development – Nxtwave Disruptive Technologies
- The Joy of Computing Using Python – NPTEL

ACHIEVEMENTS

- Secured 3rd Place – GDSC (GNI) Hackathon, demonstrating problem-solving and teamwork under competitive conditions.
